

# Virtual Engineering Week: FDA & Medical Artificial Intelligence - What You Need to Know

Virtual Event (PT)

November 30, 2020 | Events

**Bradley Merrill Thompson**, Strategic Advisor with EBG Advisors and Member of the Firm at Epstein Becker Green, will present "FDA & Medical Artificial Intelligence: What You Need to Know" at Virtual Engineering Week, which runs from November 30 to December 4, hosted by Informa Markets Division of Informa PLC.

Artificial intelligence promises to usher in a new era of healthcare, one that frees providers to focus on areas where they can do the most good while outsourcing other tasks to the machines. But the fact that AI and machine learning are advancing by leaps and bounds presents new challenges for regulators. In this session, Mr. Thompson will look at FDA's evolving stance on regulation of AI in medical devices.
